

FontSheet Maker 1.0

Thursday, 02 August 2007

bitBrain Studios has developed a useful app for any Web designer. This Windows program generates Font Sheets in HTML that shows exactly how selected fonts and styles will appear in browsers. No more editing CSS, checking, adjusting, checking...!

FontSheet Maker generates small or huge HTML pages with font samples - as a quick reference chart for your own designs or a handy resource for your web design site - like this, for example:

Â

Features include:

- Any list of font names and sizes
- Customizable text message
- Editable CSS style sheet
- Preview button
- Use it on any number of web sites

Â

Order it for \$19!
